DIVERSIFIED INTERNATIONAL COOPERATION

In January 2017, our school became one of China's first pilot universities of deepening the reform of innovation and entrepreneurship education. In July of the same year, we proposed and co-established "China-ASEAN Innovation and Entrepreneurship Education Alliance of Universities", and became a rotating chairman and a permanent secretariat of it. The Alliance now has 35 members from the territory or beyond. Our undergraduate program of electrical engineering and automation co-established with the University of Bedford, UK was approved by the Ministry of Education in 2018. It is the first Chinese-foreign cooperative

engineering education program at the undergraduate level in Guizhou Province, which is running well at present and has enrolled two sessions of students. In September to October 2019, GIT implemented the "Envoy of Friendship" training program at UTAR of Malaysia, another member of the Alliance by training 60 UTAR students for two weeks, which enhanced the educational exchanges and cooperation between the two schools. In addition, GIT plans to set up overseas branches, and has established cooperative relations with more than 10 overseas universities such as the Macau University of Science and Technology, the National University of Ireland and the Central Queensland University.
